

Four In A Row Game

OBJECT:

Be the first player to get four of your colored pucks in a row - horizontally, vertically or diagonally.

HOW TO PLAY:

1. Decide who plays first. Players will alternate turns after playing a puck.
2. Make sure the release bar on the bottom is in place so that it prevents the checkers from falling or popping out of the grid.
3. On your turn, drop one of your pucks down ANY of the slots in the top of the grid.
4. Play alternates until one player gets 4 pucks of his/her color in a row. The 4-in-a-row can be horizontal, vertical or diagonal.
5. If you're the first player to get four of your pucks in a row, you win the game.
