

Non-Glare Acrylic Wall-Mount Poster Holder Installation Information

Product #: D019750

Assembly Instructions

Frames slide over bracket that is first secured with (3) screws (supplied). Material up to 1/16" thick can be easily mounted or removed.

1) Secure aluminum bracket to wall with screws and anchors* included, recognizing that centers of screws will be about 5 1/8" below top of plexi frame.**(Use 1.4" drill bit when using plastic wall anchors)*

2) Insert poster material

3) Gently flex frame along "bowed" top to straighten it, and hook it over the support bracket... bracket has 2" shorter width so that ends will not be visible.

If your poster holders has a "bow" don't fret, it is normal for this material to do this. Once you have followed the instructions the "bow" will disappear.
